

Strong. Elegant. Chemical-Free.

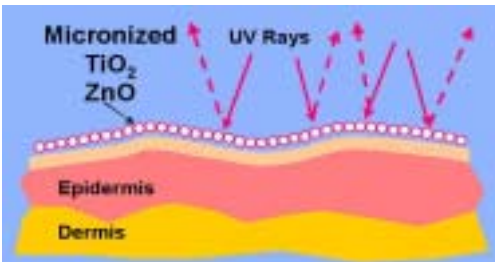

The Sunscreen Dermatologists Have Been Asking For.

OLD
Technology

Standard Titanium Dioxide & Zinc Oxide sunscreens may allow ultraviolet penetration.

NEW
Ultra-Micronized
Technology

Ultra-micronized technology repels ultraviolet penetration.

- **Micronized Titanium Dioxide & Z-Cote® Technology** Provides optimal reflection of harmful UVA/UVB rays.
- **Non-Whitening & Fragrance-Free** Ultra-small micronized particles blend invisibly onto skin.
- **Lightweight, Quick-Drying Formula** Coated particles glide easily to provide weightless, even coverage.
- **Very Water Resistant** Retains SPF after 80 minutes of activity in water or perspiring.
